Summary:

7 years of active programming experience (C#) (C++) (C) (Java) (OpenGL)

Unity Certified User (Programmer 5/24/2023) (Certiport ID: 90069901).

Game development using C#, Unity, and C / C++. Software Development using Java. Project management using Git, Github, Sourcetree, and other online project management tools (Trello). Collaboration across different departments using the Scrum framework.

Work / Professional Experience:

AUV Programmer (C++) (Python) (ROS 2) | Summer 2025

Worked together with a team of 5 other researchers to design and program an AUV for academic use. Personally responsible for writing all the code on the AUV

Sno-Isle Video Game Design | 2022-23 School Year

Collaborated with students from within my own and other departments to make 3 feature-complete video games using the Unity Game Engine. Use of Git, Sourcetree, and Trello to manage a project with multiple developers and artists (5-8 people per team per project).

Academic History:

Technical School:

Sno Isle TECH Skills Center Everett, WA

Department: Video Game Design

University (2023 - Present):

Montana State University Bozeman, MT

Degree Sought: (B.S.) Computer Science

Notable Classes:

Data Structures and Algorithms: Linked Lists, Stacks, Queues, Trees, Hashing, Sorting Algorithms.

Academic Projects:

Lead Software Engineer (C++) (Python) (ROS 2) | 2024 - Current

Lead and directed a team of 4 other software engineers to program an Autonomous Underwater Vehicle (AUV) as a part of my university's AUV program.

Indie Game Development (Unity) (C#) (C++) (C) (OpenGL) | 2019 - Current

Use of programming languages C# and C / C++ to create both 3D and 2D games. Experience with Vectors, Rigidbodies, the Unity codebase, Raylib, and Game Engine Development.
